

Singing in the Shower is ReinVENTed: Broan-NuTone® Introduces Lighted Bluetooth Speaker Fan Cover For DIY-Lite

Broan-NuTone® to Launch Sensonic™ Lighted Speaker Fan Cover 5-Minute Upgrade Kits at IBS 2020

HARTFORD, Wis. (January 17, 2020) – Bathrooms are arguably the most essential room in the house, but they can come with dirty reputations. Broan-NuTone’s latest DIY innovation is about to turn the powder room into the party room in 5 minutes or less. The industry leader in residential ventilation and air quality solutions is proud to introduce the Sensonic™ Lighted Speaker Fan Cover with Bluetooth®-Enabled speaker at this year’s [International Builders’ Show](#), happening January 21-23 in Las Vegas.

The Sensonic™ Lighted Speaker Cover and upgrade kit is the fastest DIY audio/light upgrade on the market, allowing homeowners to transform a tired incandescent bath fan into a sleek LED light with brilliant audio in just minutes. The simple upgrade uses an existing bathroom feature to illuminate the room, prevent clutter on countertops, and free up much-needed outlets. From playlists to podcasts, users can enjoy entertainment and privacy at the touch of a button with a Bluetooth®-Enabled Sensonic speaker producing rich sound from above.

The Sensonic™ Lighted Speaker Cover upgrade kit seamlessly replaces most new or existing Broan-NuTone fan in just five minutes or less. The fastest DIY audio/fan/light upgrade is built for the DIY-Lite, allowing even the most novice of DIY’ers to experience their space on another level without calling a professional. The quick-connect pass-thru plug eliminates the need for extra wiring and the grille is sized just right to conveniently cover existing drywall cuts for an easy install.

"The air we breathe affects our everyday routines. At Broan-NuTone, we believe you shouldn’t have to be a professional to Come Home to Fresh Air™ and a fresh routine," said Kyle Anderson, Associate Product Manager – Household Ventilation, for Broan-NuTone. "The Sensonic™ Lighted Speaker Cover installs in just five minutes and works quietly to protect any humidity-prone room every day while delivering brilliant lighting and audio performance hidden in plain sight."

Designed to blend into any aesthetic, the modern, low-profile LED lighted grille’s white finish is specially formulated to coordinate with the most popular white ceiling paint colors. The sleek CleanCover™ grille also stays cleaner longer with fewer vent slots for a longer-lasting clean while the Soft LED illuminates darker areas of the bathroom with 600 Lumens at 3000K Color Temperature for a Rated Life of 25,000 hours.

Take five minutes to Come Home to Fresh Air (and sound!) at IBS 2020: <https://www.broan-nutone.com/en-us/ibs-2020>.
