Broan® 27000 Series Downdraft System ECLIPSE®

Ultimate styling complements virtually every cooktop style. Mounts behind most built-in cooktops in island, peninsula and wall mount installations. The unit mounts flush with the cooktop when not in operation, and is activated by light pressure on the cover which automatically raises the chimney 7" above the cooktop. The elevated chimney enables smoke and vapor to be captured at the top of most cooking vessels. A touch on the top of the chimney retracts it to its down position. Washable aluminum filters.

In the bath they control humidity, and in a utility room, kitchen or high-traffic family room they keep the air fresh and comfortable. 12-3/4" x 8-1/4" x 6-3/4" high housing. 7-3/8" round trim. NuTone® LoProfile™ Ventilation Fan

The new NuTone LoProfile™ fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2 x 4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet and efficient ventilation.

LP80H

LPN80F

NuTone® LoProfile™ Project Pack

The new NuTone LoProfile™ fan is our latest solution for installations where conventional ventilation simply won't fit. Where multi-family applications require it, the LoProfile™ fan is narrow enough to be installed in a wall between 2 x 4 studs. When plumbing or electrical obstructions are found behind the drywall in ceiling remodel applications, our LoProfile™ fan can still fit without having to move anything. And that means most any room with space constraints can have powerful, quiet and efficient ventilation. Project Packs offer availability to buy housings for rough-in and motor/blower assemblies and grille later for finishing.

Broan SmartSense® Intelligent Ventilation System

The intelligent fan control system creates an integrated residential exhaust ventilation system using Broan's industry leading ventilation control technology and award winning QTXE fans. The Broan SmartSense system uses Broan's Link-Logic™ control technology powered by INSTEON™, a powerful communication technology to monitor everyday manual fan usage throughout the home. Broan SmartSense calculates additional ventilation required by Green Building and ASHRAE Standard 62 related requirements and automatically controls installed fans to achieve proper ventilation. SSQTXE080 and SSQTXE110 fans can provide a single fan solution for small apartments or mix and matched for a customized, integrated ventilation system.
