

#### The industry's most advanced residential fresh air system, created to offer a universal platform specifically designed and improved to make contractors life easier and more profitable while delivering constant superior air quality.

- Thanks to the Virtuo Air Technology<sup>™</sup>, the airflow calibration and auto-balancing are achieved quickly and maintained throughout the life of the product
- Select the desired CFM (from 35 to 160 CFM) using the proven integrated LCD screen
- Integrated electronic airflow measurement device with real time LCD
- Integrated diagnostic tool
- Equipped with PMSM ECM motors for energy efficient
- Suspended installation (chains included)
- Wall-mount installation (universal brackets included)
  - installation with 2 brackets
  - installation with 4 brackets

## Fresh Air Systems - 160 CFM

Top ports: B160H65RT Side ports: B160H65RS

> 35 to 159 CFM @ 0.2 in. w.g. 35 to 150 CFM @ 0.4 in. w.g.

Parts/Motor

Visit Broan-NuTone.com for complete warranty text.

## **Unit Description**

- SRE of 68% at 32°F (64 CFM) and 60% at -13°F (68 CFM)
- Ports size: 6"
- Recirculation defrost
- Corrosion resistant galvanized steel door and cabinet
- One-piece molded insulation shell, no air leakage (expanded polystyrene; UL 94 HF-1 certified)
- Virtuo constant airflow and auto-balancing device (patent pending)
- Motorized dampers (no additional backdraft dampers reauired)
- Integrated "snap-in" drain system installed in seconds with no additional parts (drain hose included)
- Recirculate air within the dwelling with recirculation mode using a main wall control
- 6' power cord
- Unit electrical characteristics: 120 volts, 60 Hz, 2.4 A, 163 W

## **Controls**

**AUTOMATIC** 

ADVANCED

BOOST

There are 4 optional main controls and 2 optional auxiliary controls available. Refer to Wall Control specification sheet for more information.

#### Core

• Polypropylene crossflow core, impact resistant Dimensions: 12" x 12" x 9" (30.5 cm x 30.5 cm x 23 cm)

#### **Filters**

- MERV 8 grade washable standard filter (included)
- Optional MERV 13 grade filter part no. V24285¹

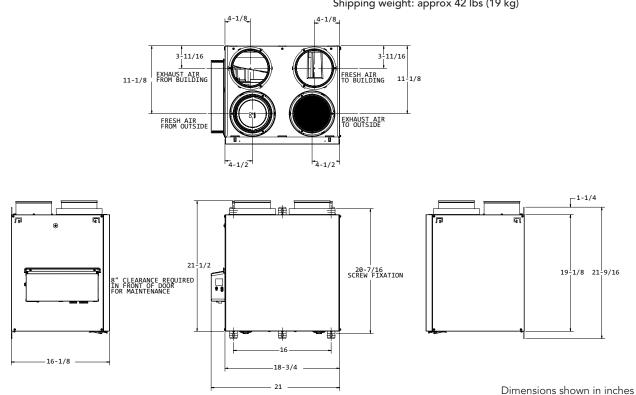

### **Options**

• Compatible with Tandem Terminations (part no. VTYIK1 and V14695) (CFM output must meet application requirements)

<sup>1</sup>Airflow performances associated with MERV 13 optional filter are not HVI certified. However, from tests performed by the manufacturer, such performances are not affected by the use of this filter.

# **6" Ports Dimensions (Top Ports)**

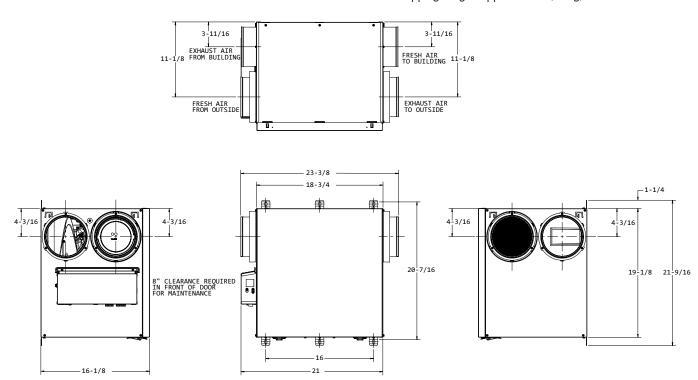

Total assembled weight: approx 35 lbs (15.9 kg) (core included) Shipping weight: approx 42 lbs (19 kg)

# **6" Ports Dimensions (Side Ports)**

VK0128

Total assembled weight: approx 35 lbs (15.9 kg) (core included) Shipping weight: approx 42 lbs (19 kg)

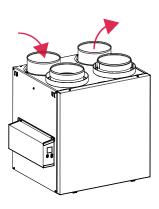

VK0127

### **Defrost System**

#### Homeshield™ Defrosting System

Defrost is activated at a temperature of 23°F and lower as specified within the table. No negative pressure is created by air exhausted to the outdoors since the air is recirculated into the house, helping to prevent any backdraft.

| DISCRETION (Factory setting) | Outdoor Temperature*       |                       |                                |                       |                                  |                       |

<sup>\*</sup>Outdoor temperature is read by a thermistor located inside the unit, next to fresh air from outdoor port.

### **Fan Curves with Virtuo**

Thanks to Virtuo Air Technology™, no need to balance the unit manually. Both PMSM motors are controlled by an artificial intelligence performing 120 readings per minute then processing this information to maintain the requested airflow.

For typical installation, Virtuo will ensure a balanced ventilation at every selected speed regardless of the weather conditions, the type of connection, the variable speed furnace/AHU, the stack effect, the filter clogging and so on. This results in peace of mind for installers and users knowing that the unit will always remain balanced and that it will maintain its maximum heat/energy recovery efficiency.
