

FOR IMMEDIATE RELEASE

## **Broan-NuTone Introduces Broan® ONE - the Only ERV with Infield Selectable Airflow Configuration Set to Simplify Installations**

*ONE & Done: Innovating Multi-Family Ventilation with Code Confidence*

**Hartford, Wis.** (July 16, 2024) – [Broan-NuTone](#) has raised the industry standard and achieved the impossible with a low-profile platform that is more powerful, more energy-efficient, and features superior filtration. Most impressive is the patent-pending technology for infield selectable airflow configuration. As the industry leader in indoor air quality and ventilation products, Broan-NuTone proudly announces the launch of its latest innovation, the [Broan® ONE](#) fresh air system. This cutting-edge Energy Recovery Ventilator (ERV) is set to transform the way mechanical engineers, builders, and contractors approach whole-home ventilation design and installation.

Designed with versatility and ease-of-use at its core, Broan® ONE is the only ERV on the market featuring Infield Selectable Airflow Configuration. This unique feature allows for on-the-spot airflow configuration ensuring that every installation meets exact specifications and allowing the installer to be confident they will meet code requirements. With Broan® ONE, staying on-spec has never been simpler.

“We are incredibly excited to introduce the Broan® ONE fresh air system to the market,” said Dominic Blanchette the VP, General Manager for Fresh Air Systems at Broan-NuTone. “This product embodies our commitment to innovation that is focused on providing a solution to builders, engineers and contractors that is more efficient and reduces call-backs, saving time and protecting the home. By providing a versatile, easy-to-install solution with unparalleled performance, we are confident that Broan® ONE will set a new standard in the ventilation industry.”

Engineered with advanced TrueCFM™ and VIRTUO™ technology, Broan® ONE delivers unparalleled performance and efficiency from installation to inspection. The system’s self-adjusting capabilities ensure consistent, energy-efficient airflow, making it ideal for even complex multifamily projects. Once balanced, the system maintains contractor-set CFMs, eliminating future performance concerns due to unbalanced airflows.

Broan® ONE’s compact design fits seamlessly into tight spaces, making it perfect for projects with demanding specifications. Its adaptable design allows for easy accommodation of various models and mirrored floor plans through a simple integrated selection switch. This innovative feature not only simplifies design and installation but also reduces time spent on product location, ductwork routing, and configuration.

“We listened to the challenges faced by mechanical engineers and contractors, particularly the difficulties in ensuring installations are code-compliant and adaptable to various project demands,” said Travis Rasch, Product Manager & Whole Home Ventilation Expert at Broan-NuTone. “The Broan® ONE fresh air system is our response to these challenges. It’s designed to be the ultimate solution for any project, whether residential or complex multifamily developments. It

simplifies installation in any space, making it the only product you need for consistent, hassle-free results.”

Broan-NuTone invites you to discover more about the Broan® ONE fresh air system and how it can support your journey towards effortless, one-solution installations with beyond-code performance.
