

A modern bathroom interior featuring a white vanity with a wooden countertop and a white sink. The wall is covered in white tiles with a gold geometric pattern. A large window on the left provides natural light. A white bathtub is visible on the right. A blue overlay with white text is positioned over the upper part of the image.

Roomside Series

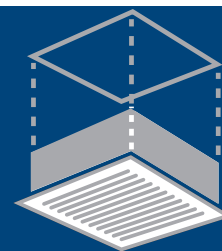

Decorative LED Ventilation Fan-Lights

STYLE THAT BLENDS IN

Upgrade the style of your bathroom or powder room with an elegant and modern decorative ventilation fan-light. Low-profile LED panels are not only bright but also long-lasting for illumination where and when you need it. Designed to completely conceal drywall cuts; the fan stays hidden behind the included adapter which blends in seamlessly with popular ceiling paint colours. Powerful, efficient ventilation works quietly to keep your space free from odours and humidity.

Roomside Series for easy installation

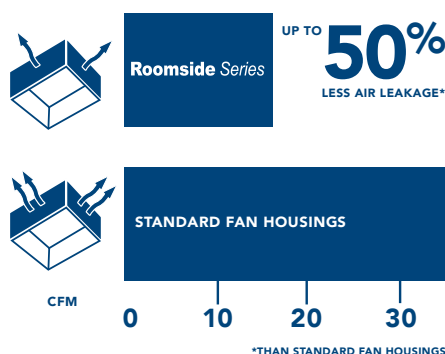

Retrofit installations can be done entirely from the room side—no attic access required. This means faster, easier installation even for the most novice do-it-yourselfer; no need to hire a professional¹.

**NO ATTIC
ACCESS NEEDED**

- Beautifully styled low-profile luminaires fit all types of decor
- Included adapter completely covers drywall cuts for hidden ventilation
- Simple installation with a plug-in light feature
- Long-lasting dimmable LED lights rated for 15,000 hours of life at a 3500 K colour temperature for a warm white glow¹
- Model 770RLTKC includes two easy-to-change trim kit finishes allowing you to quickly switch up your style.
- ENERGY STAR[®] qualified²

- Easy retrofit upgrade from the room side¹
- Roomside Series fans reduce air leakage by up to 50% compared to competitive models, resulting in better performance¹
- TrueSeal™ damper technology prevents backdrafts¹
- Fits 2" x 6" construction
